VPOD VeriSleep, a VirtuOx Home Sleep Test Device

The VirtuOx VeriSleep Program is designed to meet the Federal Motor Carrier Safety Administration (FMCSA) requirement that mandates the use of a Chain of Custody for all Home Sleep Testing when prescribed by Certified Medical Examiners who are trying to rule out Sleep Apnea for drivers seeking their medical cards.

Now with the VirtuOx VeriSleep Program you can easily follow the FMCSA's mandate and ensure the intended patient wears the Home Sleep Testing device and was not used on another person. The VeriSleep Program is designed for compatibility with any Home Sleep Testing device.
