- Available for retail purchase from your local homecare company
- Ideal for homecare, but can be used to clean multiple masks in a hospital setting
- 10 years Battery life
- 2 hours Charging time
- 24 months warranty

VirtuCLEAN 2.0, a waterless sleep machine cleaning alternative

Proper cleaning of sleep equipment requires daily cleaning of your patient's mask, and changing humidifier water. Your patient will also normally be required to clean their tubing and humidifier chamber with soap and water weekly. Studies show that patients rarely adhere to this vigorous schedule which can lead to bacteria and mold accumulation in their sleep equipment, causing various health complications.

Now, with VirtuOx's VirtuCLEAN 2.0 your patients can properly disinfect their sleep equipment!

To use this device, place your sleep equipment into your VirtuCLEAN 2.0 bag, connect your tubing to the bag and the VirtuCLEAN 2.0 device. Turn the device on, and walk away. VirtuCLEAN 2.0 will automatically clean your system using Ozone, also known as activated oxygen, in only 30 minutes.
