

Choose Subscriber Edition

Welcome Virtuox Test Account (testaccount), please select the Subscriber edition to login into VirtuOx

VirtuOx Standard Edition

VirtuOx IDTF will certify the patients test results but require prescription and proper release of records from DME. The IDTF version is typically for payers that require an IDTF to certify the Oximetry Results.

Schedule IDTF Overnight Oximetry for a:

- Medicare patient not on service with DME
- Medicare patient that is on service with DME and requires re-qualifying
- Commercial / Non-Medicare patient whose insurance requires testing by IDTF

Upload IDTF Overnight oximetry for a:

- Medicare patient not on service with DME
- Medicare patient that is on service with DME and requires re-qualifying
- Commercial / Non-Medicare patient whose insurance requires testing by IDTF

View IDTF Dashboards, ONO / HST Reports etc.

VirtuOx Office Plus Edition

VirtuOx IDTF **WILL NOT** certify the patients test results. The Office Plus version is typically for payers that **DO NOT** require an IDTF to certify the Oximetry Results.

Schedule Non-IDTF Overnight Oximetry for a:

- Commercial / HMO / PPO insurer that does not require 3rd party testing
- Non Medicare Patient
- Patient already on service with DME

Upload Non-IDTF Overnight Oximetry for a:

- Commercial / HMO / PPO insurer that does not require 3rd party testing
- Non Medicare Patient
- Patient already on service with DME

View Non-IDTF Dashboards, ONO Reports etc.

Schedule POX Test

The Office Plus version is for payers that DO NOT require an IDTF to certify the Oximetry Results or for existing patients.

VirtuOx IDTF WILL NOT certify the patients test results.

When scheduling a patient you now have the option to select Non-IDTF 02 Qualifier or Existing Patient

Non-IDTF Qualifiers will now appear in both Standard and Office Plus Edition completed queues

Existing patients will remain in Office Plus

Existing Patient or create a new patient.
Selecting Physician from the NPI Registry.
The Physician ordered the test.

* Physician :

* Patient Diagnosis :

* Rx Date :

* Is this wireless VPOD Freed test? Yes No

Non-IDTF O2 Qualifier - An Oxygen Qualifier for a payer that does not require 3rd party testing

Existing Patient - A Non-Oxygen Qualifier on service with DME (O2/PAP Titration, O2 discharge)
